EDUCATION

Mount Kenya University

Bachelor of Science in Computer Science

Sep 2023 – Present

Power Learn project

AI For Software Engineering
[certificate](#)

July 2025 – Feb 2026

EXPERIENCE

Implementation Manager

Mashrikiano Investments

Aug 2025 – May 2026

- Implemented and deployed new systems, processes, and digital solutions across departments.
- Built and maintained internal tools to improve workflows and reporting.
- Conducted financial analysis and performance tracking to support business decisions.
- Trained staff, managed system integration, and monitored adoption for smooth operations.

PROJECTS

Bioacoustic Species Classification (Wildlife Monitoring) | python, Deep Learning, ML, EDA

- Built a machine learning system to classify wildlife species from environmental audio recordings.
- Processed acoustic data using noise reduction, segmentation, and Mel spectrogram generation for feature extraction.
- Engineered and analyzed audio features to identify biodiversity and acoustic patterns across environments.
- Trained deep learning classification models optimized for noisy real-world wildlife monitoring data.
- Used Python, Librosa, NumPy, Pandas, CNNs, and audio feature engineering for scalable biodiversity analysis.

[Git repo](#)

AI Research-Backed Fact Checker | python, NLP, ML, EDA, REST API, Node JS, FastAPI

- Developed an AI-powered fact-checking system to verify whether AI-generated responses are supported by published research papers.
- Applied Natural Language Processing (NLP) techniques to analyze claims, extract key concepts, and match responses with relevant academic sources.
- Built automated pipelines for research paper retrieval, text preprocessing, and semantic similarity analysis.
- Improved response reliability by identifying unsupported, weakly supported, or evidence-backed AI outputs.
- Tools & Concepts: Python, NLP, Semantic Search, Text Processing, Research Paper Analysis, Machine Learning.

TECHNICAL SKILLS

Languages: Python, PHP, Javascript, Typescript, SQL(MySQL)

Frameworks: React, Nodejs, FastAPI, Flask

Machine Learning & AI: Deep Learning (CNNs), Natural Language Processing (NLP), ML algorithms

Libraries: Pandas, NumPy, Scikit-Learn

Systems: SDLC(Agile project Management), cPanel & WHM (WebHost Manager)

Development Tools: Git, Docker, Vscode, AWS, Google Cloud Platform, Tensorflow, MLflow, DVC

Visualization & Tools: Matplotlib, Seaborn, Tableau, PowerBI
